SERVICES

INTEGRATIVE MASSAGE ~ Massage tailored to your specific needs, which incorporates several techniques, such as Swedish Massage, Acupressure, Reflexology, and Trigger Point Work.

RELAXATION & DEEP SWEDISH MASSAGE ~ Massage using oil or lotion with light to moderate pressure. Fluid strokes and stretches release tension, promote relaxation, and increase range of motion. With **DEEP SWEDISH** the muscles are first shortened for better access of the connective tissue, and then deeper strokes are applied.

DEEP TISSUE ~ A deeper more specific type of massage, slower strokes and more direct pressure or friction is applied across the grain of the muscle. This massage is performed using little or no lotion, deep tissue massage 'releases' underlying connective tissue (fascia) which realigns structural imbalances and reduces chronic muscle tension. Breathing and movement techniques aid in releasing this muscular congestion. The techniques I use are Myofascial Release, Cross-fiber friction, and Trigger Point.

HOT STONE ~ a form of bodywork that involves the application of heated stones (Thermo Therapy) to the body within the context of a therapeutic massage. Heat Penetrates deeply, promoting profound relaxation, increased detoxification, and relief of long-standing muscular tension, stress, and fatigue.

FOOT REFLEXOLOGY ~ A form of therapeutic foot massage where specific pressure techniques are performed on the foot--these reflex points on the foot correspond with body parts. Since reflexology is a 'holistic healing art,' the goal is to create a balance and harmony throughout the 'whole' body
